Wildfire Risk is Rising in America's Heartland

Every home is at some risk of wildfire.
Your home may be at greater risk than you think.

> "I couldn't even fathom what I was seeing or how fast the fire moved."
>
> — Brain Sisson, 15 year Chief of the Arapahoe Volunteer Fire Department in Arapahoe, Nebraska

Use the Heartland Disaster Help website to find:

- Your home's unique wildfire risk.
- Free and low-cost ways to protect your home, family, and finances.
- How to engage your community and create a Wildfire Protection Plan.
- How to clean and repair your home after a wildfire.
- Local organizations that can help you prepare for and recover from a wildfire.
- Tips for what to do when a wildfire is approaching.

Did you know?

Over **85%** of wildfires are caused by people.*
